

Honeybee Centre Activity Sheet

Name: _____

Date: _____

Supplies

1 1/2 cups flour
1/2 cup salt
1 package Kool-aid
2 Tbsp vegetable oil
1 cup hot water

Method

In a large bowl, combine flour and salt. In a small bowl, dissolve the Kool-aid in boiling water. Pour liquid into the flour mixture and mix until colour is even. Knead by hand until texture is dough like. Add more flour/salt if necessary

Instructions: Help students mix the dough to the desired consistency. Then, they build hexagons and honeycomb like honeybees. Try adding as many things as would be found in an actual honeycomb, such as eggs, larva, pupa, adult worker honeybees, drones, queen bee, bee bread, etc. Provide hexagon cookie-cutters for younger students. The hexagons above can be used as a template for building honeycomb.
